RELEVANT EXPERIENCE

Associate UX Designer & Software Developer

Tech Fleet Professional Association

📅 September 2022 - current   📍 Remote

- Collaborating with other colleagues, design and build many web applications ranging from Web3 to e-commerce for different communities
- Developed and shipped production codes primarily using TypeScript, React.js. Vite, Tailwind CSS, and Firebase
- Frequently deployed on Netlify and hosted on Firebase, and tested the UI quality to ensure cross-browser and responsiveness

Apprentice UX Designer & UX Researcher

TeleVU Communication Innovation

📅 June 2022 - August 2022   📍 Toronto, ON, CA

- Collaborated with an agile team of designers and researchers to build a tele-communication hub for medical professionals
- Designed 12+ pages that are focused on desktop use of web application, with the goal of increasing the quality of video calls and connecting experience among the medical professionals --- in which it's proven to have engaged the interactivity between the product and the clinicians up to 90% from usability testing
